PROFILE

MERN Stack Developer focused on building scalable web applications and practical AI-driven solutions. Experienced in developing full-stack projects using MongoDB, Express.js, React.js, and Node.js. Built applications including an AI-powered resume analyzer, job tracker, and a full-stack blog platform. Skilled in implementing role-based systems and developing clean, responsive user interfaces with a focus on performance and usability.

PROJECTS

- AI Resume Analyzer & Job Tracker** 2025
Full Stack Web Application
 - AI-powered resume analyzer using Gemini API for instant resume feedback and smart suggestions.
 - Job tracking dashboard to manage applications, statuses, and deadlines efficiently.
 - Matched resumes with job descriptions to highlight skill gaps and improvement areas.
- Full Stack Blog Application** 2025
Full Stack Web Application
 - Complete blogging platform with user authentication, post creation, and CRUD functionality.
 - RESTful APIs with Node.js and MongoDB for dynamic content management.
 - Responsive UI built with React for smooth experience across all devices.
- Helplytics AI - Community Support Platform** 2026 - Present
Full Stack Web Application
 - AI-powered community platform connecting students with skilled helpers, featuring dashboards, leaderboards, and help request management.
 - Built multi-page UI with auto-categorization, smart tag suggestions, and urgency detection using React and Node.js.
